

I have used several type of hearing aids and hearing aid batteries over the past 15 years.

Presently, I use Energizer batteries. The battery life is longer and the new packaging (EZ Change) which removes the battery and the sticker is much easier for me. Before, I had to fiddle around a lot to remove the battery, sometimes dropping it on the floor. It was also difficult to remove the sticker.

Again, I might drop the hearing aid and sometimes I actually needed to remove the sticker with my teeth (not recommended!).

The new packaging makes battery application into my hearing aid hassle free and more efficient. I like it very much and will continue to buy it.
